## PROJECTS

- **SkillFest-An Event Co-ordination Platform** : I have developed a platform to manage the events,competitions,workshop held in our college.I have made its two sides admin and participants,admin has the privileges to create events and manage the participants records with the help of MongoDB and managed api request and Authentication using Express,JWT. Participants can able to register for events,competitions,workshop using a dynamic form generated for every event created and list their registration .I have added email service using nodemailer
- **Newsium-An News Application**: I have created a basic news application using Reactjs and News api ,It is a responsive app provides daily recent news on technology,science etc.
